To The Home Owner / Occupier

EasyHips4u is offering home owners and occupiers the opportunity to save hundreds of Pounds off their Gas and Electricity Bills.

The team at EasyHips4u include personnel with nearly 10 years experience of saving clients money on their Gas and Electricity Bills.

EasyHips4u is a front line provider of Home Information Packs and Energy Performance Certificates.

The market for Home Information Packs and Energy Performance Certificates is relatively new and normally applies to people that are selling their home. The Energy Performance Certificate is however a fantastic tool that can be used by home owners / occupiers that have no immediate intention of selling or moving home.

The information gained from the Energy Performance Certificate, coupled with our experience and knowledge of the gas and electricity markets and prices, can be combined to give you the home owner the best possible deal on your utility bills.

With the ever rising cost's of heating our homes Individuals must take action themselves to protect their dwindling disposable income.

Don't pay more for your gas and electric than you have to, your loyalty to your current supplier could be costing you a lot of money.

EasyHips4u offers a comprehensive service to its client's that includes an Energy Performance Certificate completed by a fully qualified Domestic Energy Assessor. The information gathered from the survey is entered into a computer; this generates a comprehensive energy data report with recommendations on how to save money on your fuel bills.

The details from the report are combined with our many years experience in the gas and electricity markets to give you the best money saving options.

Recent test cases have produced household savings of over £300 in the first year.

The comprehensive Home Owners / Occupiers package that we provide also means that after your initial survey and report you are not left on your own we arrange everything for you and we include a first year review to ensure you are still getting the best deal for you.

If due to price increases or market forces we find after the first year there is a better deal available for you we will action the change on your behalf at no extra cost.

The comprehensive package outlined is the EPC plus package and is very competitively priced at £82 plus vat. The first year savings will easily ensure that the package pays for itself, and you have the peace of mind that we will conduct an end of year review free of charge.

To arrange a home visit from one of our fully qualified and registered Domestic Energy Assessors please contact us from the details shown above.

House sellers come to EasyHips4u **direct and save money on your Home Information Pack. HIP Packs start from **£199 +vat.****

EasyHips4u the *RIGHT HIP* company where nothing is *LEFT* to chance.
